

# FFKM Installation Guide for WindowsOS

## Introduction

This guide provides step-by-step instructions to install the FFKM software on WindowsOS. The software must be installed in the C:\ folder as C:\FFKM.

## System Requirements

- Windows (latest version recommended)
- Scilab (latest version recommended)

## Installation Steps

### Extract and Install

1. Locate the downloaded ZIP file.
2. Double-click the ZIP file to extract its contents.
3. Rename the extracted folder to FFKM (if necessary).
4. Open Finder and navigate to the extracted FFKM folder.
5. Copy and paste the FFKM folder into the C:\.

## Running FFKM

To run the software:

1. Open Scilab.
2. Open the Scilab Terminal.
3. Navigate to the FFKM folder:

```
cd C:\FFM
```

4. Click on the file exec.sce to start the software.

## Folder Structure

- The folder DATASET contains all datasets used in the paper.
- The folder Results contains the clustering results.
